Mr. Kevin Stine is the Chief of the Applied Cybersecurity Division in the National Institute of Standards and Technology's Information Technology Laboratory. In this capacity, he leads NIST collaborations with industry, academia, and government to help organizations' better understand, measure, and manage cybersecurity and privacy risk through the effective application of standards, best practices, and technologies. The Applied Cybersecurity Division develops cybersecurity and privacy guidelines, tools, and example solutions to help address challenges in diverse areas such as public safety communications; health information technology; election infrastructure; smart grid, cyber physical, and industrial control systems; and programs focused on outreach to small businesses and federal agencies. The Division is home to several priority programs including the National Cybersecurity Center of Excellence, Cybersecurity Framework, Cybersecurity for IoT, Identity and Access Management, Privacy Engineering and Risk Management, and the National Initiative for Cybersecurity Education.
